Experiment-11

Online Supermarket System

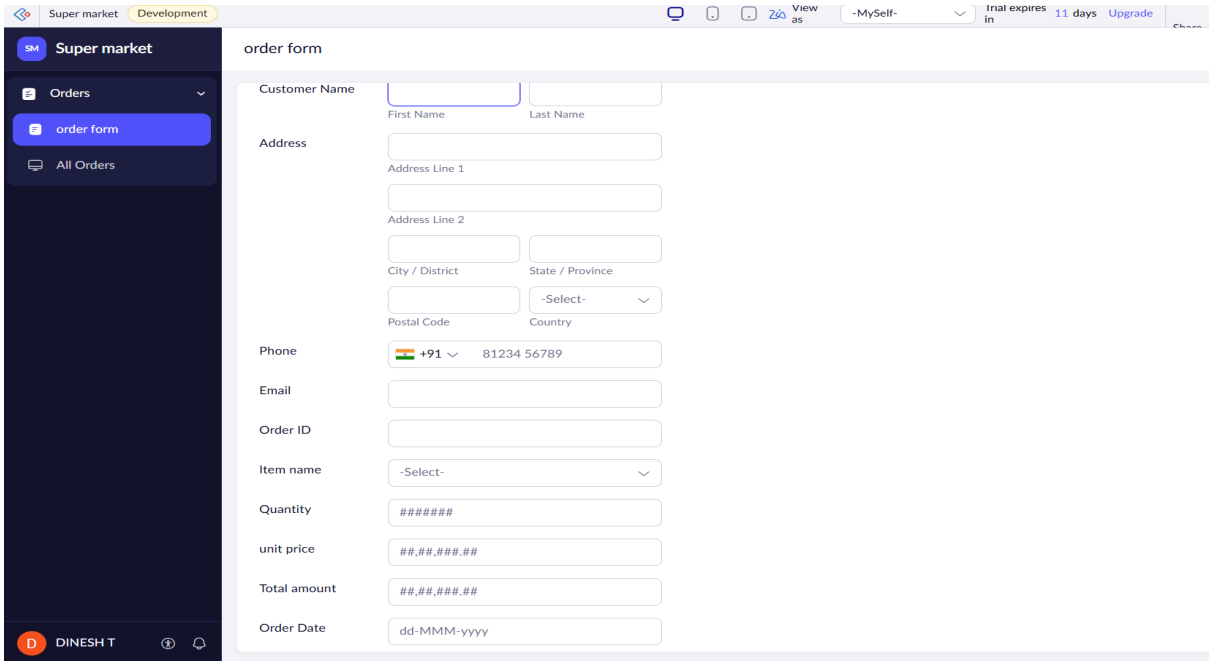

Aim

To create a cloud-based Online Supermarket Management System using Zoho Creator to demonstrate Software as a Service (SaaS).

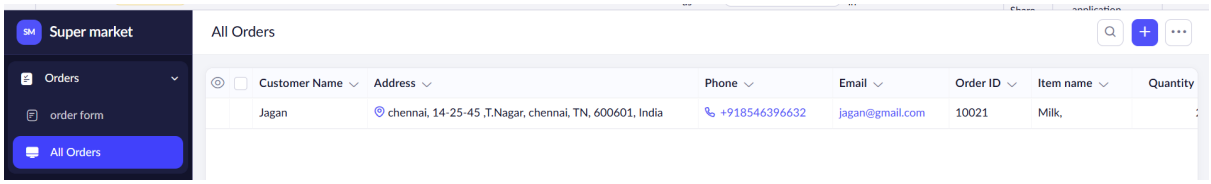

Procedure

1. Open Zoho Creator and create a new application named Online Supermarket System.
2. Create a form named Customer Order Form.
3. Add fields such as Customer Name, Address, Phone Number, Email, Item Name, Quantity, Unit Price, Total Amount, Payment Method and Order Status.
4. Create another form named Item Classification Form.
5. Add fields such as Item ID, Item Name, Item Category, Brand, Unit, Price and Available Stock.
6. Configure dropdown choices for item categories such as Grocery, Dairy, Bakery, Fruits and Vegetables.
7. Save both forms and open the live application.
8. Enter sample customer orders and item details, then submit the forms.
9. View and verify the submitted records in the reports.

Implementation

Output

Result

Successfully created a cloud-based Online Supermarket Management System using Zoho Creator to manage customer orders, product details and item classifications.
