Experiment-10

Student Information Management System

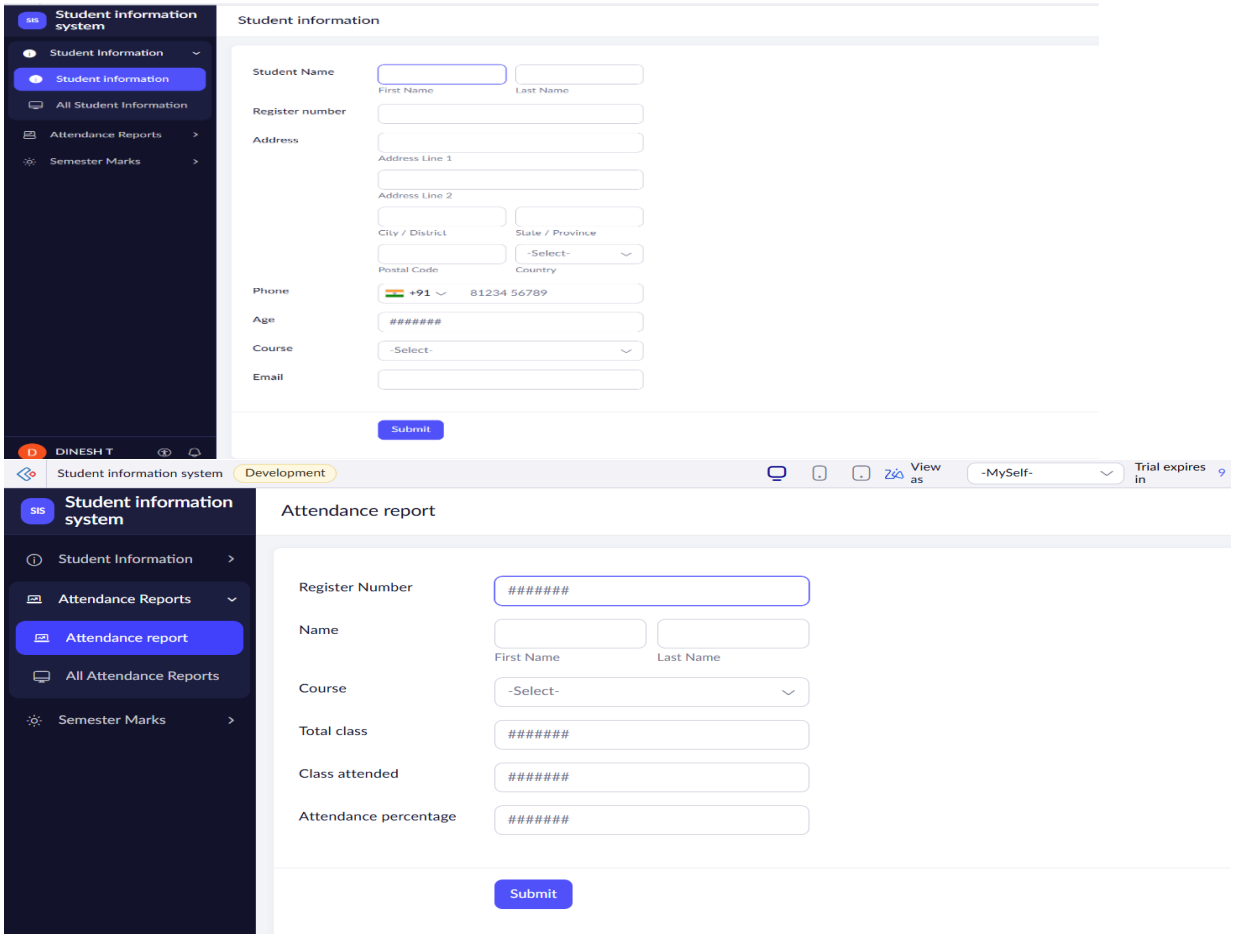

Aim:

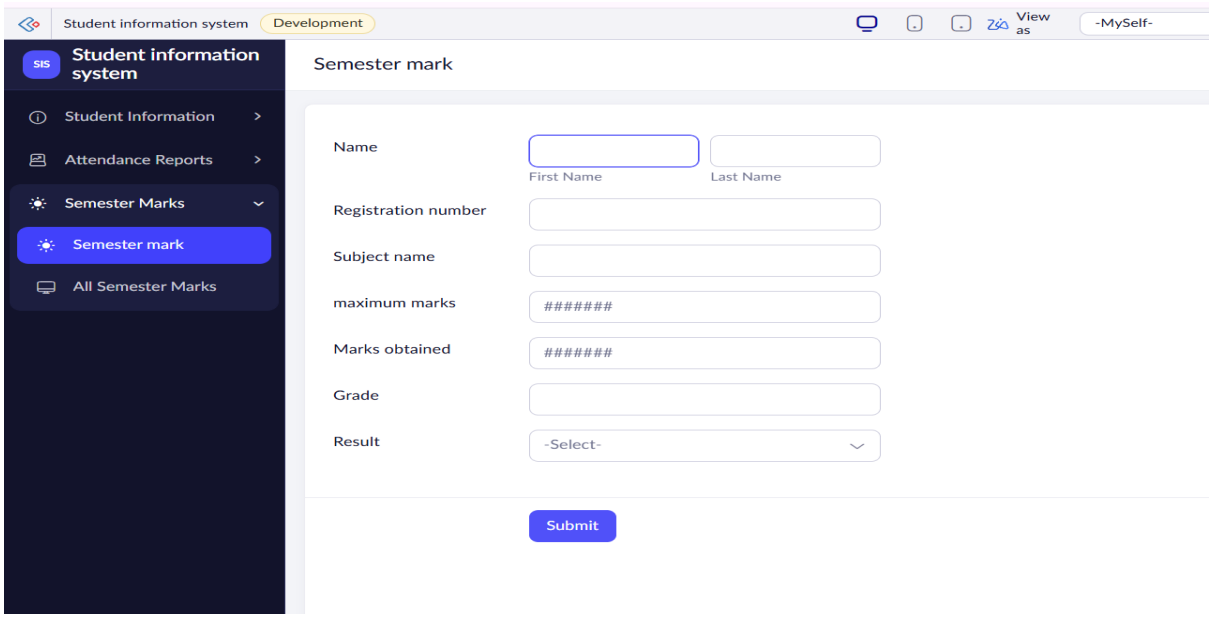

To create a cloud-based Student Information Management System using Zoho Creator to demonstrate Software as a Service (SaaS).

Procedure:

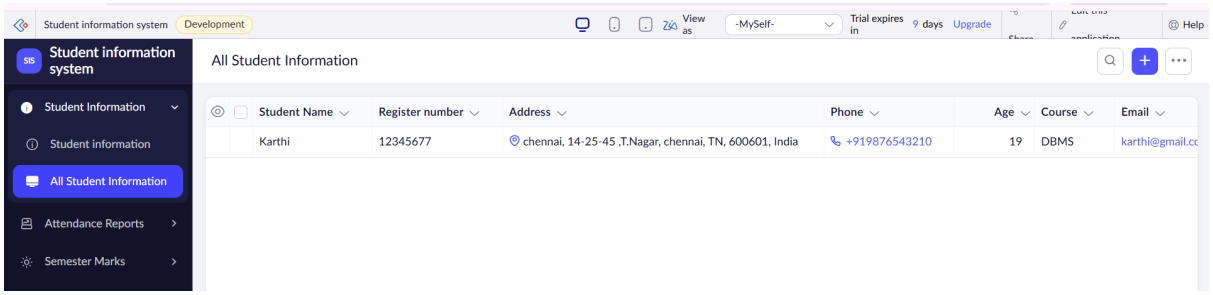

1. Create a new application in Zoho Creator.
2. Create Student Information, Attendance Report, Progress Report, and Semester Mark Sheet forms.
3. Add the required fields and configure dropdown options.
4. Save the forms and enter sample student details.
5. View the submitted records in the reports.
6. Run the C program separately to display student information.

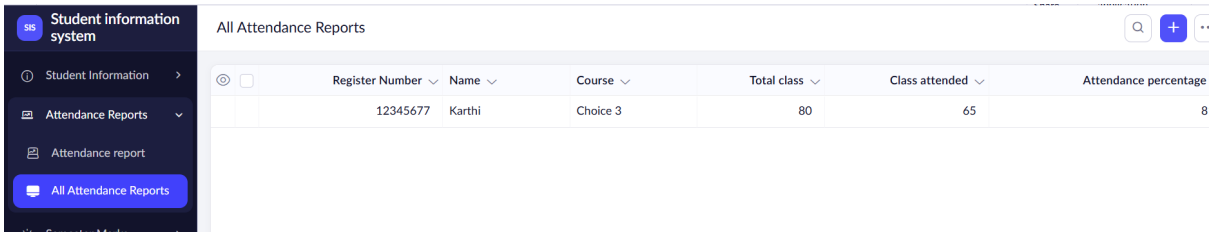

Implementation:

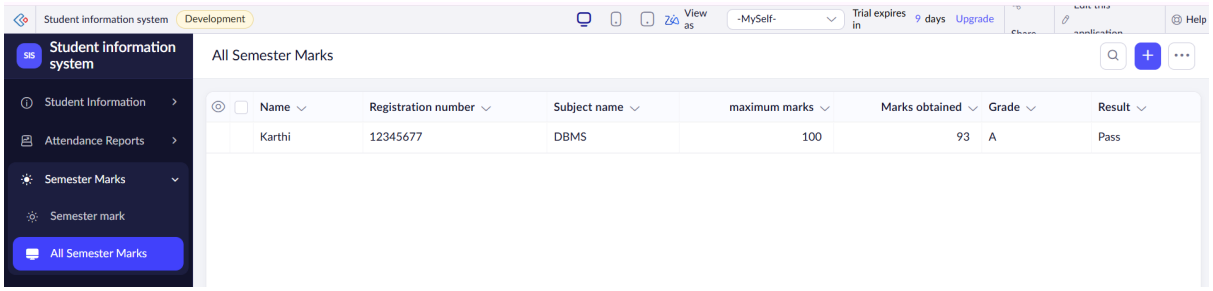

Output:

Result:

A cloud-based Student Information Management System was created to manage student details, attendance, academic progress, and semester marks using Zoho Creator.
