Experiment-7

Student Attendance Management System

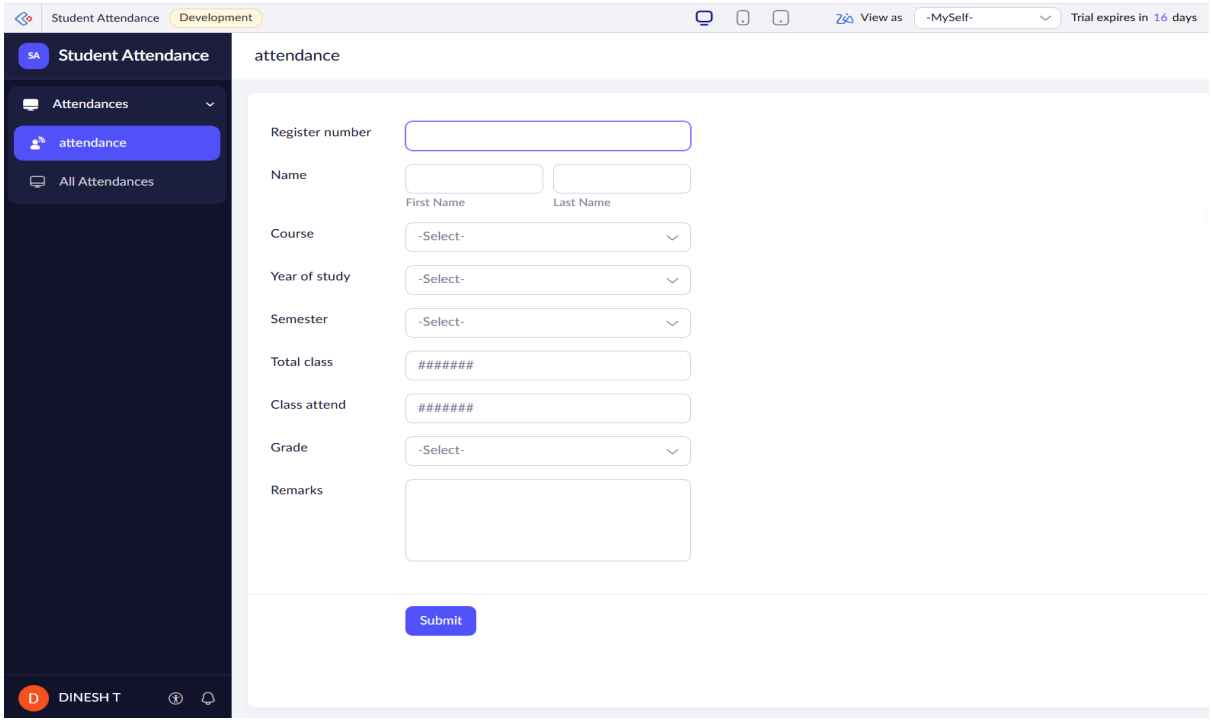

Aim

To create a cloud-based Student Attendance Management System using Zoho Creator to demonstrate Software as a Service (SaaS).

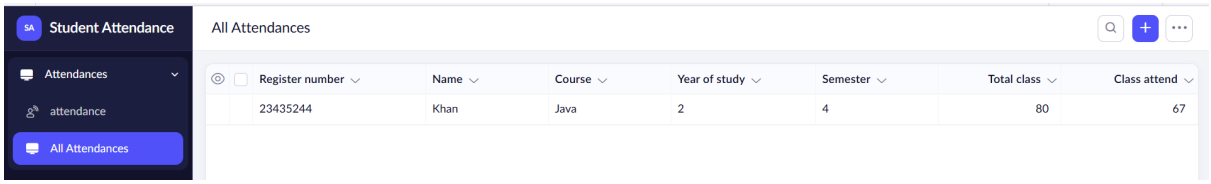

Algorithm

1. Open Zoho Creator and create a new application named Student Attendance Management System.
2. Create a Student Details Form with student name, register number, course, year and semester.
3. Create a Daily Attendance Form with attendance date and Present, Absent or OD status.
4. Create an OD Request Form with OD date, reason and approval status.
5. Configure the required fields and dropdown options.
6. Calculate attendance percentage using the number of classes attended and total classes.
7. Assign grades based on attendance percentage.
8. Save the forms, enter sample data and view the records in reports.

Implementation

Output

Result

Successfully created a cloud-based Student Attendance Management System using Zoho Creator to manage student details, attendance records, OD requests, attendance percentages and grades.
