# Experiment-4

## Library Book Reservation System

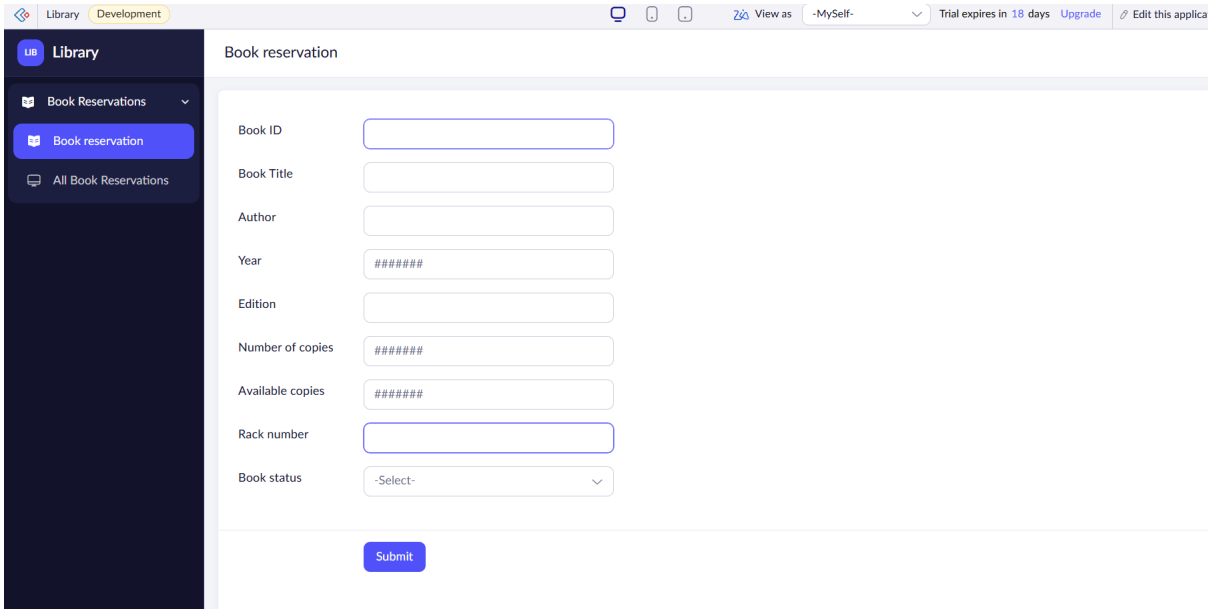

## Aim

To create a cloud-based Library Book Reservation System for SIMATS Library using Zoho Creator to demonstrate Software as a Service (SaaS).

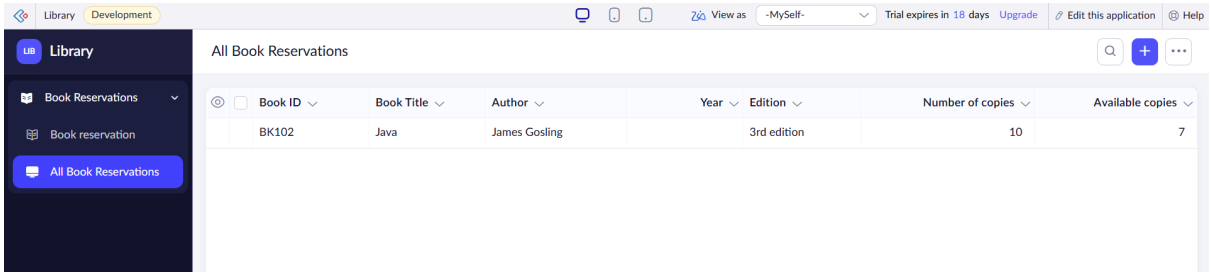

## Procedure

1. Open Zoho Creator and create a new application named SIMATS Library Book Reservation System.
2. Create a form named Book Details Form.
3. Add fields such as Book ID, Title, Author, Publication, Year, Edition, Number of Copies, Available Copies, Rack Number, and Book Status.
4. Create another form named Book Reservation Form.
5. Add fields such as Student Name, Register Number, Book ID, Reservation Date, and Reservation Status.
6. Configure the dropdown choices and save both forms.
7. Enter sample book and reservation details.
8. View the submitted records in the reports.

## Implementation

## Output

## Result

Successfully created a cloud-based Library Book Reservation System using Zoho Creator to store book details and manage student book reservations.
